Nathanael Brown

Network Cabling Installation Tech with 14+ years of project excellence. Now diving into Software Development, certified in HTML, CSS, JS, and exploring React on off hours. Let's connect! #TechPro #SoftwareDevelopment"
Clifford, Michigan, United States

Summary

Passionate about Building Exceptional Teams and Driving Success!

Hi my name is Nathanael Brown,
And with over 14 years in the dynamic world of Network Cabling and Installation, I've had the privilege of contributing to efficient and timely IT projects. From Cat5/6 to coaxial and fiber optic installations, and seamlessly integrating software and hardware—I've embraced every challenge.

But the journey doesn't stop there! While my love for networking remains steadfast, I'm also actively immersing myself in the realm of Software Development. Certified in HTML, CSS, and JavaScript, Learning doesn't stop, and neither does the excitement for what's next!

Let's connect and explore opportunities together! Your future success starts with the right team. #Hiring #TeamBuilding #CareerJourney

Best Buy

14 years

Deployment Functionality Technician
May 2011 - June 2022 (11 years 2 months)
United States

The Deployment Functionality Technician is responsible for the implementation and functionality of the low voltage IT scope of deployment projects, working both dayside and overnight shifts as part of the Deployment Project Team center of excellence.

Key Responsibilities

Ensures a positive customer experience through relationship building and meaningful solutions to fit their needs.

Installs, maintains, tests and validates IT and A/V signal distribution in both retail Best Buy locations and supply chain facilities.

Strictly adheres to BBTG cabling and device installation standards.

Performs complex functionality repairs on interactive displays.

Troubleshoots, repairs and maintains low voltage displays, associated systems and new and existing company electronic systems.

Maintains high-level knowledge and proficiency of complex vendor-provided displays.

Assists Project Deployment Supervisor with the training of new project team members and indirectly leading small teams.

Directly supports Project Deployment Supervisor in leading large-scale projects.

Provides detailed reporting to all project stakeholders and delivers routine feedback to help improve existing processes.

Project Team Specialist
July 2008 - April 2011 (2 years 10 months)
Michigan, United States

The Project Team Specialist is responsible for the implementation of all merchandising and functionality tasks associated with large-scale renovations, vendor supported activities, decommissions, store disaster recovery, special projects, and other company initiatives as assigned.

Best Buy
Retail Sales Specialist
September 2004 - April 2008 (3 years 8 months)
Oakland County, Michigan, United States

Offers store solutions and answers basic questions about store programs, services and product locations. Responsible for friendly, fast and accurate processing of all returns, exchanges, financing, service requests and defective products. Works to efficiently and accurately resolve customer service issues.
